Beth,

I would like to submit public comments for the Sanitary District board. I attended the board meeting in person last week, but according to the agenda I need to submit my questions electronically.

Sanitary District board members,

I would like to follow up on the request to fix the issue of the 10 inch storm water drainage pipe in my backyard at [10980 W 93rd Ave, St John, IN 46373](#). It has caused a significant amount of erosion on my property. Each time it rains, garbage from the streets floods onto my property as well. I would like to improve my property, but with the significant amount of storm water draining onto my property, I am unable to improve my property. This is a follow up from the request from last week's meeting. The town manager can fill in the details about this request. Thank you for assisting with this request.

Chris O'Hara

Beth R. Hernandez, IAMC
Clerk-Treasurer
